CYLANCE CONSULTING

Incident Readiness Assessment

Put Your Incident Response Plan To the Test

Benefits

- Measure the effectiveness of incident response plans, tools, and resources
- Identify, design, and deploy readiness improvements
- Build executive confidence that sensitive information and systems can be protected
- Implement a stronger security posture through readiness and response
- Aid compliance with NIST security standards

42% of respondents indicated that they do not currently assess IR processes.

Source: SANS Incident Response Capabilities in 2016 Report

Nearly every organization faces the reality of becoming the victim of a compromise. Managing the response to a cyberattack is a complex task involving the coordination of resources, tasks, and information. Under intense pressure, important decisions need to be made and stakeholders must be informed. Without a well-planned incident response plan, cyber incidents can quickly develop into unmanageable events.

Cylance® Consulting's Incident Readiness Assessment can help your organization **evaluate its ability to respond to incidents and threats**. Utilizing industry best practices, our IR experts **assist in the creation of your company's incident response program** to **ensure it is implemented**, and that the **organization will pass external assessments of its capabilities.**

Service Overview

An Incident Readiness Assessment evaluates your organization's ability to respond to incidents and threats through a policy gap analysis, staff interviews, and an incident response exercise. The assessment also evaluates phases of the NIST Cybersecurity Framework.

The assessment is conducted in six phases:

1. Preparation
2. Identification
3. Containment
4. Eradication
5. Recovery
6. Lessons Learned

Deliverables

Cylance Consulting will furnish a comprehensive report detailing:

- Gap analysis findings and recommendations for improvements including:
  - Organizational structure
  - Personnel skill sets
  - Processes
  - Reference materials
  - Infrastructure configuration
  - Incident response tools in use
- Incident response exercise findings with actionable recommendations
- NIST Cybersecurity Framework adherence
- A strategic remediation roadmap

Evaluate your organization's preparedness for a cyberattack. Contact Cylance Consulting or your technology provider to discuss an Incident Readiness Assessment.
